

Everyone deserves a place to call home.

ANNUAL GIVING CAMPAIGN

YMCA Supportive Housing Campus

We are a community solution to help eliminate homelessness by providing hope, dignity, and support in the form of permanent housing. We believe that everyone deserves a place to call home and that everyone has a story!

The Housing First model helps people who are experiencing homelessness or have other barriers to housing move into a permanent home with wraparound onsite supportive services. From there, we are able to help people meet basic needs and reach life goals. Supportive services include case management, rental subsidy, food/clothing/hygiene pantries, transportation assistance, welcome home care packages, resident activities, and so much more! The constant wait list demonstrates the need for affordable and supportive housing in our community.

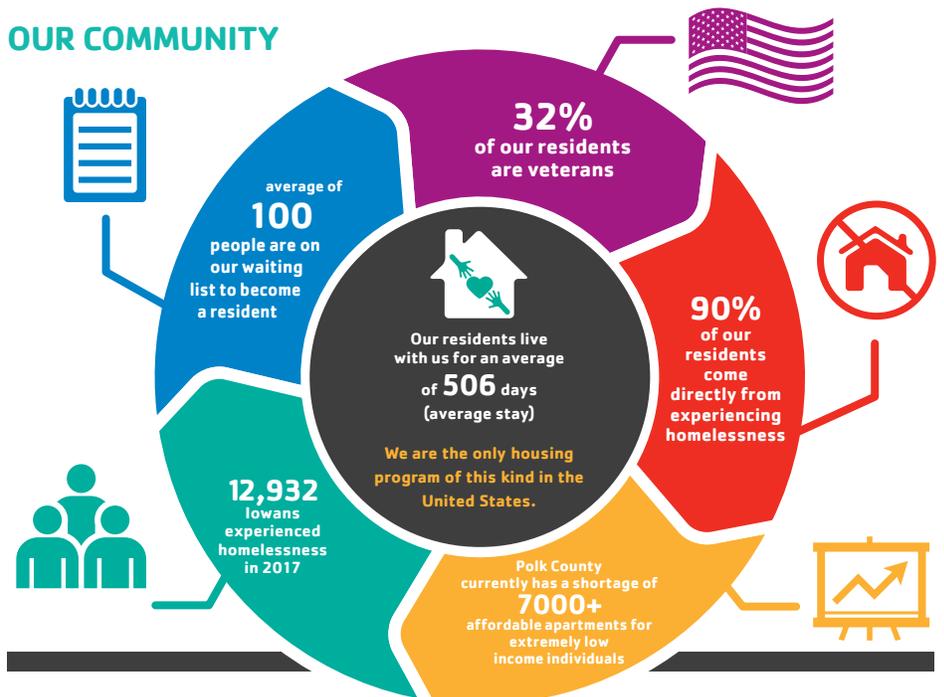

Sincerely,
Emily Osweiler, MSW
Executive Director

OUR CASE FOR SUPPORT

Supportive services take many different forms at the YMCA Supportive Housing Campus. We can help meet basic needs of food, clothing, and shelter when someone first moves in and has been living in day-to-day survival mode. We can also help meet needs of safety, security, and stability through a private affordable apartment and 24/7 staff. We see true transformation when residents connect with one another and a community of belonging forms. Residents pay for much of the rent and your donation helps provide the services to give them a hand-up back into the community. You are a part of the solution!

OUR COMMUNITY

OUR CAUSE

At the Y, strengthening community is our cause. We believe that lasting personal and social change can only come about when we all work together.

124-3010

"My already unsteady existence threatened to topple over and I was lost. At the YMCA Supportive Housing Campus I had a warm, secure, private place to live and the support and motivation I needed. If there were more resources such as this, our community would continue to grow and prosper." -Debra, former resident
